## Soundcloud Ripper

===== # Soundcloud Ripper is an intuitive tool created to allow users download music from Soundcloud. # You don't really need to be an experienced computer user to figure out the purpose of each tool, and this is indeed a very good thing for this kind of app. # In fact, it all comes down to a just a plain and simple interface that groups all tools in just one screen for a fast download process. # Just as expected, you are first required to provide the Soundcloud URL of the song you wish to download, which can be copied straight from your browser as you listen to the file. # While you're downloading, Soundcloud Ripper shows the song title, size, speed and progress, while a separate panel in the same window comprises the library. In other words, Soundcloud Ripper shows the previously-downloaded songs and thanks to the built-in player, it also gives you the option to listen to them on the go. # One of the setbacks is the lack of more configuration options, so you have nothing else to do than to provide the Soundcloud URL and start the actual downloading process. You can't even select an output folder, which means that all clips are saved in the root folder of the app. # But overall, the idea behind this project is really great: it helps you save to MP3 any song you like on Soundcloud. It doesn't slow down the computer at all and works smoothly on every Windows version out there. #!
